

## Three Killers in a Vegan Saloon

With bloody red scarfs and milky white hats, three killers walk into a vegan saloon and request milk, their *opioid* drink. Dairy consumers are calves killers. Over 21 million calves are killed yearly. The remaining calves are raped yearly starting at age one to feed the addicted dairy consumers.

The baby calf growth fluid has 59 hormones which includes high amounts of estrogen. Much research indicates dairy consumption is linked to juvenile diabetes, child autism, breast cancer, prostate cancer, BPH, Parkinson's, hip fractures, and heart disease. Consumers do not read scholarly research in PubMed. They rely on advertisers.

### *Opioid* -

Casein morphine in dairy protein has a ten percent strength of hospital morphine.

I am the bartender in the center. On the photo's left, the manager in Trump trousers enjoys delivering insults. Sadly my friend Brian is wearing a white hat.
